WINDOWS & EXTERIOR DOORS

NOT ALL VINYL IS CREATED EQUAL

Access uses the GENE0 Profile which is the first fully reinforced polymer window profile system that doesn't rely on steel for its strength. Instead, it's composed of RAU-FIPRO™; a proprietary fibre composite material similar to those used in aeronautic construction and racing vehicles for outstanding strength and load capacities. RAU-FIPRO™ uses both Fibreglass and PVC, giving you the best of both worlds.

WINDOW ADVANTAGES

THERMAL INSULATION

■ U-value down to 0.13

ELEGANT DESIGN

FORCED-ENTRY RESISTANCE

■ Up to Grade 20
(per ASTM F588)

ACOUSTIC INSULATION

■ STC Up to 45

EASE OF MAINTENANCE

COMFORT

ACCESS TILT + TURN WINDOWS

Access Window and Door products are designed for the eco-conscious home or building owner serious about energy efficiency:

Our innovative, high-tech RAU-FIPRO™ profile and unique profile design, takes the tilt + turn technology to its highest levels of strength and thermal performance, while the 40% lighter profile reduces transportation and installation costs.

Access Tilt + Turn Windows offer you convenience and functionality with the simple turn of a handle.

The tilt feature of Access Tilt + Turn Windows allows for a simple yet effective way for fresh air to enter your home and let old air escape.

The turn feature allows for effortless cleaning of the exterior glass in your window from the comfort of your home. This feature also allows for vast amounts of fresh air to enter your home.

ACCESS EXTERIOR DOORS

Access exterior doors provide top performance and intelligent design without sacrificing style.

The doors are beautiful, durable, energy efficient and engineered to perform. Access exterior doors are available in an extensive variety of styles, colours and configurations to best suit your needs.

CUSTOMIZABLE

Access works with each one of their clients to design the perfect door for their home or building.

EXTERIOR DOOR ADVANTAGES

■ SOLID CONSTRUCTION

Insulated 44mm fiberglass panels are available in different designs and treated for UV protection.

■ FRAME & SASH

Built from RAU-FIBRO™ material which is a fiber-composite similar to those employed in aerospace and racing vehicles for outstanding strength and torsional rigidity. The fiber-infused core expands / contracts 60% less than standard uPVC products.

■ FUSION-WELDED CORNERS

In addition to the benefits of uPVCs thermal properties, fusion-welded corners greatly reduce leakage potential and the need for costly sill pans/pan flashing systems.

■ 3D ADJUSTABLE HEAVY DUTY HINGES

Exact door leaf fitting in the door frame thanks to the three dimensional adjustment. Patented hinge-side safety-devices prevent unauthorized unhooking.

■ MULTIPLE LOCKING POINTS

Multi-point locking hardware assures consistent compression on the seals all around the perimeter of the sash and frame for further performance enhancements and improved security.

■ COMPRESSION-SEAL TECHNOLOGY

Compression seals optimize the air and water performance of our doors through extreme weather.

■ HIGH-DEFINITION FINISH

Only occasional cleaning with soap and water is needed to keep the surfaces looking like new; even years after installation.

■ OPTIONAL GLASS

High-Performance triple pane sealed units with double LoE coatings and Argon Gas with manufacturer warranty of 20 years. Decorative glass inserts are also available.

With **Access Windows & Exterior Doors**, you can enjoy the highest level of comfort in your home, with superior quality today, tomorrow, and for years to come.
