

# Superior Exterior Doors

TOP PERFORMANCE, INTELLIGENT DESIGN, TIMELESS STYLE

## SOLID CONSTRUCTION

Insulated 44mm Fibreglass-Panel available in different designs and treated for UV-Protection.

## FRAME & SASH

Built from RAU-FIBRO material which is a fibre-composite similar to those employed in aerospace and racing vehicles for outstanding strength and torsional rigidity. The fibre-infused core expands/contracts 60% less than standard uPVC products.

## DOOR HANDLE

Contemporarily designed door handle is angled away from the door frame for easy operating and injury prevention.

## 3D ADJUSTABLE HEAVY DUTY HINGES

Exact door leaf fitting in the door frame thanks to the three dimensional adjustment. Patented hinge-side safety devices prevent unauthorized unhinging.

## COMPRESSION-SEAL TECHNOLOGY

Triple gasket design to provide maximum insulation and smooth closing.

## FIVE POINT MECHANICAL MULTI-LOCKING SYSTEM + DEADBOLT

Security deadbolt plus five adjustable locking points are operated by the door lever handle and blocked by a cylinder lock.

## OPTIONAL GLASS

High-Performance triple pan sealed units with double LoE coatings and Argon gas with a manufacturer warranty of 20 years. Decorative glass inserts are also available.

## OPTIONAL PLEATED BLINDS

Even with triple pane glass, Pleated Blinds can be mounted flush between the glazing beads without interfering with jambs.
